

One game, three lanes. Collect. Activate. Close.

This is the Q3 plan we ratified, restated with this week's bank-verified numbers and turned into three lane commitments for sign-off. Same targets, same gates, nothing new invented: Services \$1.25M / Product \$750K / Company **\$2.0M target, \$2.5M stretch**, from the reconciled \$733K baseline. Real customers only: nothing in the cash plan counts revenue that isn't contracted today, and pipeline is shown as pipeline.

~\$122K

the honest MRR gap between
today (~\$45K/mo) and the \$2.0M
exit run-rate (~\$167K/mo).
Section 2 shows exactly what
carries it

The machine connected units. Now the humans collect, activate, and close.

Product	+42 adopted units in one week (186 total, +29.2%) , paying-without-outcome nearly halved (93 → 52), the Square POS shipping run working. Counterweight: WAU −42%, zero onboarding invitations sent.
Services	MRR \$35,320 (105 active) · July collected \$53.3K · AR cut \$60.7K → \$42.5K in three days · still open: 26 past-due subs worth \$18,642/mo , a third of subscription dollars.
Sales	3–4 demos held · 2 franchisee wins + Melty confirmed (\$6.6K) · Mindbody 9 → 30 enrolled (60% of the pilot gate) · warm track produced its first demo (Zerorez) · late stage: 6 deals, \$70.6K, led by Swig \$24.6K and Roxberry \$12K.
Truth in data	July product revenue is disputed (\$14.75K claimed vs 🏠 ~\$8–10K banked); neither gets quoted until reconciled. Stripe SaaS connector needs reconnecting. This week's two wins need HubSpot stages set so sales and pipeline reports agree.

\$45K of MRR today. \$167K exiting December. Here is what carries the difference.

Exit run-rate needed for the \$2.0M year: ~\$167K/mo. Today, bank-verified: ~\$45K/mo (\$35.3K services + ~\$10K product). The ~\$122K gap is not closed by grinding the current motion harder. It is closed by a small number of named moves, each already in a lane:

WHAT CARRIES THE GAP	EXIT MRR VALUE	STATUS	LANE
300-unit activation bar (Sep 30 gate)	~\$13.8K/mo	186 of 300	Product · +14 adopted/week; this week proved +42 is possible
Terry's book → 100% by EOY	~\$18K/mo potential	verbal, 0 onboarded	Services + Taylor · the designated first firm, starts now
Swig connect (~200 units)	~\$9.4K/mo	Appointment Held, \$24.6K staged	Sales · counts when signed; the Sep 30 rail gate rides on it
Firm channel (3 firms, wholesale entities)	~\$5–10K/mo building	2 named, 0 signed	Product builds it, sales signs it, services delivers it
20-logo blend (flagships + growth-stage)	the rest	\$3.27M pipeline, half placeholder	Sales · pipeline honesty first, then pace
Past-due + AR collections	+\$11.2K/mo recovered	contracted today	Services · the only lever that is pure execution, zero sales risk

Read it straight: the target needs most of this list to land, which is exactly what the Q3 plan said in July ("the Q4 hockey stick"). What's different now is that every line has a bank-verified starting point, an owner, and a month. If Swig and Terry both stall, \$2.0M is not reachable and we say so at the Dec 15 gate rather than pretend. That discipline is what makes the number worth signing.

Play your own lane. Same game, same scoreboard.

Services · Jared, Brad, Zac

COLLECT · DELIVER

The number: \$1.25M collected services ARR (stretch \$1.5M) · past-due below \$9K by Aug 31.

In hand today (counts now): \$35.3K MRR · \$18.6K/mo sitting past-due (26 subs; the big accounts are the ones failing) · \$42.5K open AR with a 12-invoice 90+ day tail · 2 new franchisee wins a week arriving from sales that need flawless onboarding (Tim, Rian, Stacie → Zac).

In pipeline (counts when signed): Zee pipeline \$217K across 41 deals · Terry's 74 units (~\$215K weighted, verbal) · Stella's royalty collection switch (Sept 1 pull) · bookkeeping attach on every brand sales closes, at the 50%+ conversion standard services owns.

Aug: dunning motion + ACH recheck → past-due under \$9K · decision on the 90+ tail · Terry onboarding starts. **Sep:** Terry batch one live · Stella's first pull · new-win onboarding at the 11/10 standard. **Oct:** firm-referred franchisees closing at 50%+ · Terry batch two.

Sales · Shideler

CLOSE

The number: activated Net New ARR against the \$1M quota · 5 verified demos a week · pipeline honesty: real amounts on every Zor deal by Aug 15.

In hand today (counts now): 2 wins this week + Melty \$6.6K confirmed · 6 late-stage deals worth \$70.6K (Swig \$24.6K, Roxberry \$12K) · 30 of 50 Mindbody accounts enrolled · the warm track converting (Zerorez demo) with 7 calls booked Monday.

In pipeline (counts when signed): \$3.27M open, stated honestly: ~half the Zor amounts are placeholders and \$1.72M sits in "Reschedule." Cleaning that is not admin; it is what makes the number forecastable and the raise story credible.

Aug: Roxberry scheduled · Swig forced to a next step · amounts loaded, stages fixed (this week's wins logged) · Stone/SL Franchise Group meeting booked. **Sep:** Swig signed, with the Sep 30 rail gate riding on it · Mindbody pilot gate hit (50 enrolled) · firm #2 signed. **Oct:** Mindbody warm-track conversions · first firm-sourced brand intro (the Oct 31 gate) · Roxberry-class closes stacking.

Product · Kayden, Matt

ACTIVATE · ARM THE ACCOUNTANTS

The number: 300 adopted units by Sep 30 (186 today, +14/week; this week did +42) · the accountant portal in real firms' hands.

In hand today (counts now): the Square POS pipeline that produced +42 · DonutNV's health debt (77 paying, 14 healthy: the biggest churn risk on the board) · Melty activation in flight (3-week proof) · the portal that beat our own team's tooling.

The accountant channel is product's growth lane: firm workspace free · \$23/unit/mo wholesale (50% of the \$46 retail atom, firm rebills) · brand consolidation \$249 retail / \$149 wholesale · 15% first-year referral on brand services a firm originates. Pilot offer: 50% off 90 days, we migrate, money-back. Named firms: Terry first, Stone/SL second, a third via the Akerman relationship.

Aug: portal v1 in Terry's hands with services · Melty live · Stripe SaaS connector fixed · invitations motion restarted (it hit zero this week). **Sep:** firm #2 onboarded · ~240 adopted units · DonutNV health closed via the Square template. **Oct:** 300-unit bar · brand-consolidation reporting live for firm franchisor clients · the \$12K→\$20K monthly product-collections ladder on track.

Clear lanes don't mean separate games. The logos sales signs hand services their units. The books services keeps make the product smarter. Everything product ships makes the next sale easier. When one lane wins, all of us rise.

Cash-flow positive by ~October 1, gates on time, and the honest distance to \$2.0M.

MONTH	THE OPPORTUNITY (CONTRACTED + EXECUTION ONLY)	GATE / SCOREBOARD
August	Collections closes +\$11.2K/mo of the \$20.1K burn gap · pipeline gets real amounts · Terry starts · portal in a firm's hands · win pace holds at ~2/week	Past-due < \$9K · amounts loaded · burn gap ~\$8K by Aug 31
September	Terry batch one (+\$1.7K/mo wholesale) · Melty live (+\$0.5K) · Stella's first royalty pull · Swig signed · Mindbody pilot gate hit · ~240 units adopted	Sep 30: Swig rail live (G2) · 300-unit bar · burn gap ~\$3–5K, inside Services' +\$7.9K surplus
October	Combined cash-flow positive on contracted revenue · firm #2 entities connecting · first firm-sourced brand intro · Swig units begin connecting · product collections climbing the \$12K→\$20K ladder	Oct 31: firm intro + 180+ units held (G3) · exit-run-rate trajectory readable for the Dec 15 decision gate

And the distance to the year, with no fog: executing all three months above puts exit MRR around \$65–75K: real, cash-flow positive, and still well short of the \$167K the \$2.0M target implies. The remaining distance is exactly the named list in section 2: Swig's units actually connecting, Terry to 100%, the firm channel compounding, and the 20-logo blend closing through Q4. That is the hockey stick we signed up for in July. October is when we'll know, on bank data, whether it's bending, and the Dec 15 gate is where we decide what it means, together, instead of discovering it.

Sign-off

Jared · Services: the \$1.25M number · past-due under \$9K by Aug 31 · Terry onboarding started in August · 50%+ close on brand-referred franchisees. _____

Shideler · Sales: the \$1M activated quota · real amounts on every deal by Aug 15 · 5 verified demos a week · Swig to signature in September. _____

Kayden · Product: 300 adopted units by Sep 30 · portal live with Terry in August, firm #2 in September · DonutNV health closed · connector + invitations fixed this week. _____

Taylor: Terry relationship to 100% · firm pilot offers out · the September funding decision made in August
· Friday scoreboard from pulls, every week. _____

CoverPanda · leadership sign-off · not for distribution · figures marked  are Mercury/Stripe bank-verified Aug 7 · disputed figures (July product, June services) are flagged and excluded until reconciled · pipeline values shown as pipeline, counted only on signature
